During the last trading day the stock fluctuated **1.63%** from a day low at **\$22.70** to a day high of **\$23.07**. The price has fallen in 6 of the last 10 days and is down by **-0.87%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. The stock lies in the middle of a falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-2.91%** during the next 3 months and, with a 90% probability hold a price between **\$21.69** and **\$23.18** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Friday, April 19, 2024**, and so far it has risen 1.65%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Nuveen NASDAQ 100 Dynamic Overwrite Fund** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$22.88** and **\$23.41**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

**Nuveen NASDAQ 100 Dynamic Overwrite Fund** finds support from accumulated volume at **\$22.69** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
