Tech commentaries:

The **Rathbone Brothers plc** stock price gained **1.18%** on the last trading day (Friday, 3rd May 2024), rising from **£1,690.00** to **£1,710.00**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **2.00%** from a day low at **£1,696.00** to a day high of **£1,730.00**. The price has risen in 8 of the last 10 days and is up by **9.48%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **20 thousand** more shares were traded than the day before. In total, **81 thousand** shares were bought and sold for approximately **£137.95** million.

Given the current short-term trend, the stock is expected to rise **3.05%** during the next 3 months and, with a 90% probability hold a price between **£1,563.12** and **£1,762.16** at the end of this 3-month period.

The **Rathbone Brothers plc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **£1,648.57** and **£1,572.80**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Friday, March 22, 2024**, and so far it has risen 14.46%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **£1,602.00** and **£1,580.00**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock is usually traded at a good volume, and with minor daily changes, the risk is considered to be low. During the last day, the stock moved **£34.00 (2.00%)** between high and low. For the last week, the stock has had daily average volatility of **2.13%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Rathbone Brothers plc** stock to perform well in the short-term.

Risk: **Low**

Evaluation: **Buy Candidate**
