Tech commentaries:

No changes to the price of **River iGaming p.l.c.** stock on the last trading day (Thursday, 16th May 2024). During the last trading day the stock fluctuated **6.56%** from a day low at **kr24.40** to a day high of **kr26.00**. The price has been going up and down for this period, and there has been a 4.84% gain for the last 2 weeks.

The stock has broken the very wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **kr25.55**, a level that may pose a second chance to hit a runner. According to fan-theory **kr30.76** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **River iGaming p.l.c.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **kr25.91** and **kr25.75**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely as it may be a "turning point". Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, May 02, 2024**, and so far it has fallen -0.763%. Further fall is indicated until a new bottom pivot has been found.

River iGaming p.l.c. finds support from accumulated volume at **kr25.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **kr27.00**, **kr27.80** and **kr28.20**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **kr1.60** between high and low, or **6.56%**. For the last week, the stock has had daily average volatility of **3.81%**.

River iGaming p.l.c. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Medium

Evaluation: Hold/Accumulate
