Tech commentaries:

The **Renault SA** stock price fell by **-0.304%** on the last day (Wednesday, 1st May 2024) from **\$9.87** to **\$9.84**. During the last trading day the stock fluctuated **2.04%** from a day low at **\$9.82** to a day high of **\$10.02**. The price has risen in 6 of the last 10 days but is still down by **-3.81%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-8 thousand** shares and in total, **12 thousand** shares were bought and sold for approximately **\$119.05** thousand.

Given the current short-term trend, the stock is expected to rise **38.34%** during the next 3 months and, with a 90% probability hold a price between **\$13.61** and **\$16.32** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Renault SA** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$10.21** and **\$10.13**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, April 09, 2024**, and so far it has fallen **-10.07%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day, which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk.

On the downside, the stock finds support just below today's level from accumulated volume at **\$9.13** and **\$8.13**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$10.07**, **\$10.21** and **\$10.80**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **\$0.200** between high and low, or **2.04%**. For the last week the stock has had daily average volatility of **1.57%**.

The Renault SA stock holds several negative signals and despite the positive trend, we believe **Renault SA** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
