Tech commentaries:

The **Roots Corp.** stock price fell by **-2.08%** on the last day (Friday, 26th Apr 2024) from **\$2.40** to **\$2.35**. During the last trading day the stock fluctuated **4.80%** from a day low at **\$2.29** to a day high of **\$2.40**. The price has fallen in 5 of the last 10 days and is down by **-2.08%** for this period. Volume has increased on the last day by **2 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **7 thousand** shares were bought and sold for approximately **\$16.00** thousand.

The stock lies in the lower part of a wide and weak rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$2.29** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **2.52%** during the next 3 months and, with a 90% probability hold a price between **\$2.35** and **\$2.65** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Tuesday, April 23, 2024**, and so far it has risen 2.62%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Roots Corp.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$2.36** and **\$2.38**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). **Roots Corp.** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs". The very low volume increases the risk and reduces the other technical signals issued.

Roots Corp. finds support from accumulated volume at **\$2.33** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$2.38**, **\$2.40** and **\$2.56**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.110** between high and low, or **4.80%**. For the last week, the stock has had daily average volatility of **3.48%**.

Roots Corp. holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
