Tech commentaries:

The **Rush Street Interactive, Inc.** stock price gained **2.72%** on the last trading day (Friday, 24th May 2024), rising from **\$8.45** to **\$8.68**. During the last trading day the stock fluctuated **2.06%** from a day low at **\$8.52** to a day high of **\$8.69**. The price has risen in 6 of the last 10 days and is up by **2.84%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **128 thousand** more shares were traded than the day before. In total, 1 million shares were bought and sold for approximately **\$11.88** million.

The stock lies in the upper part of a very wide and strong rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$8.99** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **53.16%** during the next 3 months and, with a 90% probability hold a price between **\$10.71** and **\$13.77** at the end of this 3-month period.

The **Rush Street Interactive, Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$8.64** and **\$7.41**. A breakdown below any of these levels will issue sell signals. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, May 20, 2024**, and so far it has fallen -1.25%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **\$7.86** and **\$7.55**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$8.73**, **\$8.74** and **\$8.79**.

This stock may move very much during the day (volatility) and with a very large prediction interval from the Bollinger Band this stock is considered to be "very high risk". During the last day, the stock moved **\$0.175** between high and low, or **2.06%**. For the last week, the stock has had daily average volatility of **3.39%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Rush Street Interactive, Inc.** stock to perform well in the short-term.

Risk: Very High
