A buy signal was issued from a pivot bottom point on **Friday, June 14, 2024**, and so far it has risen **6.58%**. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. The **Invesco Markets Plc - Invesco Euro Stoxx** ETF holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. On further gains, the ETF will meet resistance from the long-term Moving Average at **£8,695.85**. On a fall, the ETF will find some support from the short-term average at **£8,445.59**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal.
