MACD: Buy

Tech commentaries:

No changes to the price of **Schroder British Opportunities Trust Plc** stock on the last trading day (Tuesday, 25th Jun 2024). During the last trading day the stock fluctuated **0.93%** from a day low at **£75.30** to a day high of **£76.00**. The price has been going up and down for this period, and there has been a **-1.29%** loss for the last 2 weeks.

The stock lies the upper part of a wide and falling trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break up at the top trend line at **£77.58** will firstly indicate a slower falling rate, but may be the first sign of a trend shift. Given the current short-term trend, the stock is expected to fall **-5.00%** during the next 3 months and, with a 90% probability hold a price between **£64.74** and **£73.71** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

The **Schroder British Opportunities Trust Plc** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **£76.14**. On a fall, the stock will find some support from the long-term average at approximately **£73.56**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, June 17, 2024**, and so far it has fallen **-2.56%**. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point".

Schroder British Opportunities Trust Plc finds support from accumulated volume at **£75.50** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **£77.50**, **£78.00** and **£79.50**.

In general the stock tends to have controlled movements and therefore the general risk is considered low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **£0.700** between high and low, or **0.93%**. For the last week the stock has had daily average volatility of **2.29%**.

Schroder British Opportunities Trust Plc holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
