Tech commentaries:

The **Selvaag Bolig ASA** stock price gained **2.10%** on the last trading day (Tuesday, 7th May 2024), rising from **kr35.70** to **kr36.45**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **4.40%** from a day low at **kr35.20** to a day high of **kr36.75**. The price has been going up and down for this period, and there has been a **-0.41%** loss for the last 2 weeks. Volume fell on the last day by **-30 thousand** shares and in total, **16 thousand** shares were bought and sold for approximately **kr576.46** thousand. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **12.78%** during the next 3 months and, with a 90% probability hold a price between **kr38.44** and **kr45.57** at the end of this 3-month period.

There are mixed signals in the stock today. The **Selvaag Bolig ASA** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **kr36.45**. On a fall, the stock will find some support from the short-term average at **kr34.93**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may also not. A buy signal was issued from a pivot bottom point on **Monday, April 29, 2024**, and so far it has risen 8.16%. Further rise is indicated until a new top pivot has been found.

On the downside, the stock finds support just below today's level from accumulated volume at **kr33.00** and **kr32.85**. On the upside the stock meets some resistance just above today's level from accumulated volume at **kr36.60**, **kr36.65** and **kr38.70**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **kr1.55** between high and low, or **4.40%**. For the last week the stock has had daily average volatility of **3.64%**.

Selvaag Bolig ASA holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
