Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-100 thousand** shares and in total, **194 thousand** shares were bought and sold for approximately **\$2.63 million**.

Given the current short-term trend, the stock is expected to rise **21.05%** during the next 3 months and, with a 90% probability hold a price between **\$16.37** and **\$19.41** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **SandRidge Energy** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$14.28** and **\$14.46**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Wednesday, April 03, 2024**, and so far it has fallen **-10.58%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

**SandRidge Energy** finds support from accumulated volume at **\$13.38** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$13.64**, **\$13.76** and **\$14.75**.
