Tech commentaries:

The **Stronghold Digital Mining, Inc.** stock price gained **0.676%** on the last trading day (Wednesday, 8th May 2024), rising from **\$2.96** to **\$2.98**. During the last trading day the stock fluctuated **6.05%** from a day low at **\$2.81** to a day high of **\$2.98**. The price has fallen in 6 of the last 10 days and is down by **-14.61%** for this period. Volume fell on the last day by **-133 thousand** shares and in total, **184 thousand** shares were bought and sold for approximately **\$548.25** thousand. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-44.56%** during the next 3 months and, with a 90% probability hold a price between **\$0.81** and **\$1.89** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Stronghold Digital Mining, Inc.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$3.12** and **\$3.40**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, April 25, 2024**, and so far it has fallen **-21.99%**. Further fall is indicated until a new bottom pivot has been found. Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may also not.

On the downside, the stock finds support just below today's level from accumulated volume at **\$2.69** and **\$2.37**. On the upside the stock meets some resistance from accumulated volume at **\$3.49**, **\$3.62** and **\$3.64**.

This stock may move very much during the day (volatility) and with periodic low trading volume this stock is considered to be "very high risk". During the last day, the stock moved **\$0.170** between high and low, or **6.05%**. For the last week the stock has had daily average volatility of **10.40%**.

Stronghold Digital Mining, Inc. holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: Very High

Evaluation: Strong Sell Candidate
