Tech commentaries:

The **Superior Drilling Products, Inc** stock price gained **2.02%** on the last trading day (Friday, 26th Apr 2024), rising from **\$1.24** to **\$1.26**. During the last trading day the stock fluctuated **6.72%** from a day low at **\$1.19** to a day high of **\$1.27**. The price has risen in 5 of the last 10 days and is up by **14.38%** over the past 2 weeks. Volume fell on the last day by **-207 thousand** shares and in total, **68 thousand** shares were bought and sold for approximately **\$85.76 thousand**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the upper part of a wide and strong rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$1.30** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **81.12%** during the next 3 months and, with a 90% probability hold a price between **\$1.89** and **\$2.35** at the end of this 3-month period.

There are mixed signals in the stock today. A sell signal was issued from a pivot top point on **Monday, April 22, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued. The **Superior Drilling Products, Inc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$1.23** and **\$1.03**. A breakdown below any of these levels will issue sell signals.

On the downside, the stock finds support just below today's level from accumulated volume at **\$1.13** and **\$1.06**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock may move much during the day (volatility) and with periodic low trading volume this stock is considered to be "high risk". During the last day, the stock moved **\$0.0800** between high and low, or **6.72%**. For the last week the stock has had daily average volatility of **6.38%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Superior Drilling Products, Inc** stock to perform well in the short-term.

Risk: **High**

Evaluation: **Buy Candidate**
