Mostly positive signals in the chart today. The **Lyxor Index Fund - Lyxor Stoxx Europe** ETF holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the ETF has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. A buy signal was issued from a pivot bottom point on **Friday, June 14, 2024**, and so far it has risen 3.22%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Lyxor Index Fund - Lyxor Stoxx Europe** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued.

Lyxor Index Fund - Lyxor Stoxx Europe finds support from accumulated volume at **15.65€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **16.23€**, **16.30€** and **16.43€**.
