Tech commentaries:

No changes to the price of **SolChicks Shards USD** cryptocurrency on the last trading day (Saturday, 29th Jun 2024). During the last trading day the cryptocurrency fluctuated **0%** from a day low at **\$0.0003** to a day high of **\$0.0003**. The price has been going up and down for this period, and there has been a 1% gain for the last 2 weeks.

The cryptocurrency is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **SolChicks Shards USD** cryptocurrency with a 90% probability to be traded between \$0.0003 and \$0.0003 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and cryptocurrencies seldom manage to go directly from the bottom of a trend up to the top. Cryptocurrencies turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **SolChicks Shards USD** cryptocurrency holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at \$0.0003 and \$0.0003. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Sunday, May 05, 2024**, and so far it has fallen - 0.328%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

SolChicks Shards USD finds support from accumulated volume at \$0.0003 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.0003**, **\$0.0003** and **\$0.0003**.

In general the cryptocurrency tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the cryptocurrency During the last day, the cryptocurrency moved **\$0** between high and low, or **0%**. For the last week the cryptocurrency has had daily average volatility of **0%**

SolChicks Shards USD holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
