Tech commentaries:

The **Siri Prime Office Property Fund** trust price gained **13.19%** on the last trading day (Friday, 28th Jun 2024), rising from **77.20** to **78.15**. During the last trading day the trust fluctuated **0%** from a day low at **78.15** to a day high of **78.15**. The price has been going up and down for this period, and there has been a **12.41%** gain for the last 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **100** more shares were traded than the day before. In total, **100** shares were bought and sold for approximately **7815.00**.

The trust has broken the wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **78.13**, a level that may pose a second chance to hit a runner. According to fan-theory **79.65** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **Siri Prime Office Property Fund** trust holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the trust has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **77.69** and **78.02**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, June 24, 2024**, and so far it has risen **13.99%**. Further rise is indicated until a new top pivot has been found. **Siri Prime Office Property Fund** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Siri Prime Office Property Fund finds support from accumulated volume at **77.95** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the trust meets some resistance just above today's level from accumulated volume at **78.45**, **78.80** and **78.95**.

In general the trust tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the trust moved **0%** between high and low, or **0%**. For the last week the trust has had daily average volatility of **0%**.

Siri Prime Office Property Fund holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
