Tech commentaries:

The **Credit Suisse Ag** ETF price fell by **-0.84%** on the last day (Friday, 3rd May 2024) from **\$76.46** to **\$75.82**. During the last trading day the ETF fluctuated **0.84%** from a day low at **\$75.28** to a day high of **\$75.91**. The price has been going up and down for this period, and there has been a **-5.58%** loss for the last 2 weeks. Volume has increased on the last day by **642** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **3** thousand shares were bought and sold for approximately **\$247.93** thousand.

Given the current short-term trend, the ETF is expected to rise **14.77%** during the next 3 months and, with a 90% probability hold a price between **\$87.02** and **\$95.39** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Credit Suisse Ag** ETF holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$76.71** and **\$77.48**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Monday, April 15, 2024**, and so far it has fallen **-6.05%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). **Credit Suisse Ag** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

On the downside, the ETF finds support just below today's level from accumulated volume at **\$71.47** and **\$70.40**. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$77.47**, **\$79.53** and **\$79.95**.

This ETF is usually traded at a good volume, and with minor daily changes, the risk is considered to be low. During the last day, the ETF moved **\$0.634 (0.84%)** between high and low. For the last week, the ETF has had daily average volatility of **1.10%**.

The Credit Suisse Ag ETF holds several negative signals and despite the positive trend, we believe **Credit Suisse Ag** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this ETF.

Risk: **Low**

Evaluation: **Sell Candidate**
