The price has fallen in 6 of the last 10 days but is still up by **8.58%** over the past 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **19.05%** during the next 3 months and, with a 90% probability hold a price between **\$9.95** and **\$11.51** at the end of this 3-month period.

The **Solaris Oilfield Infrastructure Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. On corrections down, there will be some support from the lines at **\$8.78** and **\$8.66**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, April 26, 2024**, and so far it has fallen **-4.15%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Solaris Oilfield Infrastructure Inc. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.
