## Tech commentaries:

The **1Spatial Plc** stock price fell by **-2.62%** on the last day (Friday, 10th May 2024) from **£68.80** to **£67.00**. During the last trading day the stock fluctuated **2.46%** from a day low at **£66.80** to a day high of **£68.45**. The price has been going up and down for this period, and there has been a 10.74% gain for the last 2 weeks. Volume has increased on the last day by **142 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **142 thousand** shares were bought and sold for approximately **£9.51** million.

The stock lies in the upper part of a wide and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **£68.89** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **8.28%** during the next 3 months and, with a 90% probability hold a price between **£63.84** and **£74.59** at the end of this 3-month period.

The **1Spatial Plc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **£65.80** and **£60.63**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, May 09, 2024**, and so far it has fallen -2.62%. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

On the downside, the stock finds support just below today's level from accumulated volume at **£62.00** and **£58.50**. On the upside the stock meets some resistance just above today's level from accumulated volume at **£68.80**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **£1.65** between high and low, or **2.46%**. For the last week, the stock has had daily average volatility of **3.23%**.

**1Spatial Plc** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
