MACD: Sell

## Tech commentaries:

No changes to the price of **Social Reality Inc** stock on the last trading day (Friday, 10th May 2024). During the last trading day the stock fluctuated **26.60%** from a day low at **\$0.150** to a day high of **\$0.190**. The price has risen in 5 of the last 10 days and is up by **114.29%** over the past 2 weeks.

The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **75.05%** during the next 3 months and, with a 90% probability hold a price between **\$0.133** and **\$0.524** at the end of this 3-month period.

The **Social Reality Inc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$0.122** and **\$0.143**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, March 04, 2024**, and so far it has fallen -25.00%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance from accumulated volume at **\$0.175**, **\$0.185**.

This stock may move very much during the day (volatility) and with periodic low trading volume this stock is considered to be "very high risk". During the last day, the stock moved **\$0.0399** between high and low, or **26.60%**. For the last week the stock has had daily average volatility of **43.50%**.

**Social Reality Inc** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

**Risk: Very High**

**Evaluation: Hold/Accumulate**
