The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

Mostly positive signals in the chart today. The **Tal Education Group** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock.
