Tech commentaries:

The **Titan Environmental Solutions Inc.** stock price gained **15.38%** on the last trading day (Friday, 28th Jun 2024), rising from **\$0.130** to **\$0.150**. During the last trading day the stock fluctuated **0%** from a day low at **\$0.150** to a day high of **\$0.150**. The price has been going up and down for this period, and there has been a 7.14% gain for the last 2 weeks. Volume fell on the last day by **-50 thousand** shares and in total, **5 thousand** shares were bought and sold for approximately **\$750.00**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **38.68%** during the next 3 months and, with a 90% probability hold a price between **\$0.184** and **\$0.267** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Thursday, June 27, 2024**, and so far it has risen 15.38%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Titan Environmental Solutions Inc.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$0.169** and **\$0.154**. A break-up above any of these levels will issue buy signals. Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the stock finds support just below today's level from accumulated volume at **\$0.140** and **\$0.130**. On the upside the stock meets some resistance from accumulated volume at **\$0.160**, **\$0.180**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **8.89%**.

Titan Environmental Solutions Inc. holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
