The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. A buy signal was issued from a pivot bottom point on **Friday, March 01, 2024**, and so far it has risen 6.33%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.
