Volume fell on the last day by **-118 thousand** shares and in total, **3** million shares were bought and sold for approximately **15.57€**million. The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **5.67%** during the next 3 months and, with a 90% probability hold a price between **4.79€** and **5.79€** at the end of this 3-month period.

Mostly positive signals in the chart today. The **thyssenkrupp AG** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. A buy signal was issued from a pivot bottom point on **Thursday, April 25, 2024**, and so far it has risen 11.37%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

thyssenkrupp AG finds support from accumulated volume at **4.93€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **5.16€**, **5.24€** and **5.27€**.
