The stock lies in the upper part of a wide and strong rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **TRY 10.91** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **28.74%** during the next 3 months and, with a 90% probability hold a price between **TRY 12.27** and **TRY 14.05** at the end of this 3-month period.

The **Turkiye Sinai Kalkinma Bankasi A.S.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **TRY 10.22** and **TRY 9.59**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 25, 2024**, and so far it has risen 11.19%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Turkiye Sinai Kalkinma Bankasi A.S. finds support from accumulated volume at TRY 10.25 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
