MACD:	Sell

## Tech commentaries:

No changes to the price of **TESARO** fund on the last trading day (Wednesday, 13th Feb 2019). During the last trading day the fund fluctuated **0%** from a day low at **\$74.96** to a day high of **\$74.96**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The fund has broken the very wide and strong rising short-term trend down. This signalizes a slower rate of rising, but may also be an early warning about a possible trend shift. Due to the trend being broken there will now be resistance at the bottom line of the trend at **\$76.71**. A reaction back to this level may hold a second chance to get out before further falls.

The **TESARO** fund holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$74.96** and **\$74.65**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, February 12, 2019**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

**TESARO** finds support from accumulated volume at \$73.78 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the fund may perform very well during the next couple of days.

In general the fund tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the fund. During the last day, the fund moved **\$0** between high and low, or **0%**. For the last week the fund has had daily average volatility of **0%**.

**TESARO** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this fund since the last evaluation from a Buy to a Hold/Accumulate candidate.

**Risk:** Low

**Evaluation:** Hold/Accumulate
