## Tech commentaries:

The **TUI AG** stock price fell by **-1.86%** on the last day (Friday, 31st May 2024) from **6.46€** to **6.34€**. It has now fallen 3 days in a row. During the last trading day the stock fluctuated **3.44%** from a day low at **6.27€** to a day high of **6.49€**. The price has fallen in 6 of the last 10 days and is down by **-2.94%** for this period. Volume has increased on the last day by **4 million** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **9 million** shares were bought and sold for approximately **54.32€** million.

The stock lies in the lower of a wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **6.28€** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-4.90%** during the next 3 months and, with a 90% probability hold a price between **5.98€** and **7.30€** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Thursday, May 23, 2024**, and so far it has risen **0.285%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **TUI AG** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **6.48€** and **6.68€**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**TUI AG** finds support from accumulated volume at **6.32€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **6.69€**, **6.90€** and **7.49€**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **0.216€** between high and low, or **3.44%**. For the last week, the stock has had daily average volatility of **3.75%**.

**TUI AG** holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

**Risk:** Medium

**Evaluation:** Sell Candidate
