Sell candidate since May 04, 2024 Loss -44.00%

StockInvest.us Gyneju st. 14, "ROCKIT" Vilnius, LT-01109 Lithuania

#/ 50877

Trend: MV Long: MV Short: Buy Volume: Sell MACD: Buy

## **Tech commentaries:**

No changes to the price of UBIX.Network USD stock on the last trading day (Thursday, 20th Jun 2024). During the last trading day the stock fluctuated 7.14% from a day low at \$0.000014 to a day high of \$0.000015. The price has been going up and down for this period, and there has been a -12.5% loss for the last 2 weeks.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall -44.37% during the next 3 months and, with a 90% probability hold a price between \$0.00000223 and \$0.00001231 at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

There are mixed signals in the stock today. The UBIX.Network USD stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at \$0.00001486 and \$0.00001791. A break-up above any of these levels will issue buy signals. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on Friday, June 14, 2024, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance from accumulated volume at \$0.000015, \$0.000016 and \$0.000017.

This stock may move much during the day (volatility) and with periodic low trading volume this stock is considered to be "high risk". During the last day, the stock moved \$0.000001 between high and low, or 7.14%. For the last week the stock has had daily average volatility of 14.77%.

UBIX.Network USD holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: High

**Evaluation: Strong Sell Candidate**
