The price has been going up and down for this period, and there has been a **-0.06%** loss for the last 2 weeks. The stock is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **United Community Banks, Inc.** stock with a 90% probability to be traded between **\$23.50** and **\$24.60** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Tuesday, June 04, 2024**, and so far it has risen 0.192%. Further rise is indicated until a new top pivot has been found. The **United Community Banks, Inc.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$23.77** and **\$23.74**. A break-up above any of these levels will issue buy signals. Volume fell along with the price during the last trading day, which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk.

**United Community Banks, Inc.** finds support from accumulated volume at **\$23.49** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$23.55**, **\$23.76** and **\$23.87**.
