Tech commentaries:

The **United Drilling Tools Limited** stock price fell by **-0.81%** on the last day (Friday, 28th Jun 2024) from **223.15** to **231.25**. It has now fallen 3 days in a row. During the last trading day the stock fluctuated **3.00%** from a day low at **228.50** to a day high of **235.35**. The price has fallen in 7 of the last 10 days and is down by **-1.05%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **807** shares and in total, **1** thousand shares were bought and sold for approximately **296.00** thousand.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-10.62%** during the next 3 months and, with a 90% probability hold a price between **176.03** and **233.41** at the end of this 3-month period.

There are mixed signals in the stock today. The **United Drilling Tools Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **233.21** and **236.01**. A break-up above any of these levels will issue buy signals. Volume fell along with the price during the last trading day, which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. A buy signal was issued from a pivot bottom point on **Tuesday, June 04, 2024**, and so far it has risen 12.23%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

United Drilling Tools Limited finds support from accumulated volume at **227.30** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **232.25**, **282.15** and **282.55**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **76.85** between high and low, or **3.00%**. For the last week the stock has had daily average volatility of **3.40%**.

United Drilling Tools Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
