The price has risen in 7 of the last 10 days and is up by **3.72%** over the past 2 weeks. In total, **26 thousand** shares were bought and sold for approximately **24.36 million**.

The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **17.32%** during the next 3 months and, with a 90% probability hold a price between **176.83** and **203.46** at the end of this 3-month period.

The **Uniphos Enterprises Ltd** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **168.83**. On a fall, the stock will find some support from the long-term average at approximately **158.16**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 25, 2024**, and so far it has fallen **-2.27%**. Further fall is indicated until a new bottom pivot has been found.

**Uniphos Enterprises Ltd** finds support from accumulated volume at **165.17** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **169.12**, **170.72** and **172.18**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **7.29** between high and low, or **4.37%**. For the last week, the stock has had daily average volatility of **4.86%**.

**Uniphos Enterprises Ltd** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
