The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. A buy signal was issued from a pivot bottom point on **Monday, April 01, 2024**, and so far it has risen 11.78%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

On the downside, the stock finds support just below today's level from accumulated volume at **\$235.78** and **\$229.72**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

**United Therapeutics Corporation** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Low**
