## Tech commentaries:

No changes to the price of **Veidekke ASA** stock on the last trading day (Wednesday, 26th Jun 2024). During the last trading day the stock fluctuated **0.88%** from a day low at **kr114.20** to a day high of **kr115.20**. The price has risen in 6 of the last 10 days and is up by **2.32%** over the past 2 weeks.

The stock is moving within a horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Veidekke ASA** stock with a 90% probability to be traded between **kr110.81** and **kr117.81** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Veidekke ASA** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **kr114.51** and **kr114.69**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, June 24, 2024**, and so far it has fallen - 1.03%. Further fall is indicated until a new bottom pivot has been found. Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days.

**Veidekke ASA** finds support from accumulated volume at **kr114.60** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **kr115.00**, **kr115.20** and **kr116.00**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **kr1.00** between high and low, or **0.88%**. For the last week the stock has had daily average volatility of **1.12%**.

**Veidekke ASA** holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
