Tech commentaries:

The **Venus Remedies Limited** stock price fell by **-1.94%** on the last day (Wednesday, 26th Jun 2024) from **373.75** to **366.50**. During the last trading day the stock fluctuated **3.62%** from a day low at **364.60** to a day high of **377.80**. The price has risen in 6 of the last 10 days and is up by **13.49%** over the past 2 weeks. Volume has increased on the last day by **17 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **56 thousand** shares were bought and sold for approximately **20.38** million.

The stock lies in the upper part of a very wide and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **382.57** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **3.93%** during the next 3 months and, with a 90% probability hold a price between **305.23** and **397.59** at the end of this 3-month period.

The **Venus Remedies Limited** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **375.55**. On a fall, the stock will find some support from the long-term average at approximately **324.39**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, June 24, 2024**, and so far it has fallen **-4.08%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Venus Remedies Limited finds support from accumulated volume at **354.35** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **375.20**, **375.60** and **376.65**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **13.20** between high and low, or **3.62%**. For the last week, the stock has had daily average volatility of **3.29%**.

Venus Remedies Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: High

Evaluation: Hold/Accumulate
