## Tech commentaries:

No changes to the price of **Vault Hill City USD** cryptocurrency on the last trading day (Monday, 20th May 2024). During the last trading day the cryptocurrency fluctuated **0%** from a day low at **\$0.0018** to a day high of **\$0.0018**. The price has fallen in 5 of the last 10 days but is still up by **12.51%** over the past 2 weeks.

The cryptocurrency lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to rise **29.48%** during the next 3 months and, with a 90% probability hold a price between **\$0.0018** and **\$0.0028** at the end of this 3-month period.

The **Vault Hill City USD** cryptocurrency holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the cryptocurrency giving a positive forecast for the stock. On further gains, the cryptocurrency will meet resistance from the short-term Moving Average at approximately **\$0.0018**. On a fall, the cryptocurrency will find some support from the long-term average at approximately **\$0.0016**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, May 16, 2024**, and so far it has fallen - 18.80%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

**Vault Hill City USD** finds support from accumulated volume at \$0.0017 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.0018**, **\$0.0021** and **\$0.0022**.

This cryptocurrency may move very much during the day (volatility) and with periodic low trading volume this cryptocurrency is considered to be "very high risk". During the last day, the cryptocurrency moved **\$0** between high and low, or **0%**. For the last week the cryptocurrency has had daily average volatility of **1.61%**.

**Vault Hill City USD** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

**Risk: Very High**

**Evaluation: Hold/Accumulate**
