Tech commentaries:

The **Vodafone Group plc** stock price fell by **-3.27%** on the last day (Tuesday, 30th Apr 2024) from **0.82€** to **0.793€**. During the last trading day the stock fluctuated **3.13%** from a day low at **0.791€** to a day high of **0.82€**. The price has risen in 7 of the last 10 days and is up by **1.77%** over the past 2 weeks. Volume has increased on the last day by **3 million** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **5 million** shares were bought and sold for approximately **4.03€** million.

The stock lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **2.45%** during the next 3 months and, with a 90% probability hold a price between **0.787€** and **0.87€** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Tuesday, April 16, 2024**, and so far it has risen 1.77%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Vodafone Group plc** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **0.81€** and **0.80€**. A break-up above any of these levels will issue buy signals. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Vodafone Group plc finds support from accumulated volume at 0.789€ and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **0.81€**, **0.81€** and **0.83€**.

This stock is usually traded at a good volume, and with minor daily changes, the risk is considered to be low. During the last day, the stock moved **0.0248€ (3.13%)** between high and low. For the last week, the stock has had daily average volatility of **2.19%**.

The Vodafone Group plc stock holds several negative signals and despite the positive trend, we believe **Vodafone Group plc** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
