MACD: Buy

## Tech commentaries:

No changes to the price of **Vendetta Mining Corp.** stock on the last trading day (Tuesday, 25th Jun 2024). During the last trading day the stock fluctuated **50.00%** from a day low at **\$0.0100** to a day high of **\$0.0150**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The stock has broken the very wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **\$0.0147**, a level that may pose a second chance to hit a runner. According to fan-theory **\$0.0200** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely at it may be a "turning point". The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Vendetta Mining Corp.** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the long-term average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **\$0.0166**. On a fall, the stock will find some support from the short-term average at **\$0.0143**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Monday, June 24, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.0050** between high and low, or **50.00%**. For the last week, the stock has had daily average volatility of **10.00%**.

**Vendetta Mining Corp.** holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **High**

Evaluation: **Sell Candidate**
