Tech commentaries:

The **Voyager Therapeutics** stock price gained **3.28%** on the last trading day (Friday, 3rd May 2024), rising from **\$8.53** to **\$8.81**. It has now gained 6 days in a row. It is not often that stocks manage to gain so many days in a row, and falls for a day or two should be expected. During the last trading day the stock fluctuated **3.60%** from a day low at **\$8.61** to a day high of **\$8.92**. The price has risen in 8 of the last 10 days and is up by **17.47%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **25 thousand** more shares were traded than the day before. In total, **453 thousand** shares were bought and sold for approximately **\$3.99 million**.

The stock lies in the middle of a very wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **3.57%** during the next 3 months and, with a 90% probability hold a price between **\$7.72** and **\$11.06** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Voyager Therapeutics** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$8.05** and **\$8.74**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 25, 2024**, and so far it has risen 18.73%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

On the downside, the stock finds support just below today's level from accumulated volume at **\$8.32** and **\$7.57**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$9.09**, **\$9.28** and **\$9.44**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.310** between high and low, or **3.60%**. For the last week, the stock has had daily average volatility of **4.81%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Voyager Therapeutics** stock to perform well in the short-term. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Buy candidate.

Risk: **High**

Evaluation: **Buy Candidate**
