Tech commentaries:

The **XAU/ARS** currency pair price fell by **-0.0050%** on the last day (Friday, 28th Jun 2024) from **\$2,119,235.50** to **\$2,119,128.80**. During the last trading day the currency pair fluctuated **0.91%** from a day low at **\$2,112,737.00** to a day high of **\$2,131,937.60**. The price has fallen in 6 of the last 10 days but is still up by **0.63%** over the past 2 weeks. Volume has increased on the last day by **11** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **1** thousand shares were bought and sold for approximately **\$2.58** billion.

The currency pair lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the currency pair is expected to rise **5.62%** during the next 3 months and, with a 90% probability hold a price between **\$2,169,616.54** and **\$2,330,492.29** at the end of this 3-month period.

The **XAU/ARS** currency pair holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$2,114,153.93** and **\$2,104,245.12**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, May 20, 2024**, and so far it has fallen - 1.65%. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the currency pair should be followed more closely.

XAU/ARS finds support from accumulated volume at \$2,084,124.50 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the currency pair meets some resistance just above today's level from accumulated volume at **\$2,136,266.30**, **\$2,154,006.00** and **\$2,154,620.80**.

In general the currency pair tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the currency pair moved **\$19,200.60** between high and low, or **0.91%**. For the last week the currency pair has had daily average volatility of **1.10%**.

XAU/ARS holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this currency pair since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
