Volume: Buy  
MACD: Buy

## Tech commentaries:

The **XAU/AUD** currency pair price fell by **-0.95%** on the last day (Wednesday, 26th Jun 2024) from **A\$3,489.51** to **A\$3,456.33**. During the last trading day the currency pair fluctuated **1.46%** from a day low at **A\$3,451.13** to a day high of **A\$3,501.55**. The price has fallen in 7 of the last 10 days and is down by **-1.19%** for this period. Volume has increased on the last day by **32 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **260 thousand** shares were bought and sold for approximately **A\$898.38** million.

The currency pair is moving within a wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **XAU/AUD** currency pair with a 90% probability to be traded between A\$3,271.80 and A\$3,641.90 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and currency pairs seldom manage to go directly from the bottom of a trend up to the top. Currency pairs turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **XAU/AUD** currency pair holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **A\$3,501.76** and **A\$3,531.07**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Friday, April 19, 2024**, and so far it has fallen **-7.19%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the currency pair should be followed more closely.

**XAU/AUD** finds support from accumulated volume at A\$3,426.95 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the currency pair meets some resistance just above today's level from accumulated volume at **A\$3,471.05**, **A\$3,500.62** and **A\$3,526.35**.

In general the currency pair tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the currency pair moved **A\$50.43** between high and low, or **1.46%**. For the last week the currency pair has had daily average volatility of **1.26%**.

**XAU/AUD** holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this currency pair. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this currency pair since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
