## Tech commentaries:

The **iShares Core S&P/TSX Capped Composite** ETF price gained **0.433%** on the last trading day (Thursday, 2nd May 2024), rising from **\$34.68** to **\$34.83**. During the last trading day the ETF fluctuated **0.97%** from a day low at **\$34.60** to a day high of **\$34.94**. The price has risen in 7 of the last 10 days and is up by **0.69%** over the past 2 weeks. Volume fell on the last day by - **412 thousand** shares and in total, **331 thousand** shares were bought and sold for approximately **\$11.53** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The ETF lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the ETF is expected to rise **4.81%** during the next 3 months and, with a 90% probability hold a price between **\$36.00** and **\$37.85** at the end of this 3-month period.

Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The ETF should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **iShares Core S&P/TSX Capped Composite** ETF holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$34.88** and **\$35.03**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, April 09, 2024**, and so far it has fallen -2.30%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

**iShares Core S&P/TSX Capped Composite** finds support from accumulated volume at **\$34.68** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$34.90**, **\$34.91** and **\$35.09**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.335** between high and low, or **0.97%**. For the last week the ETF has had daily average volatility of **0.91%**.

**iShares Core S&P/TSX Capped Composite** holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
