Volume: Buy  
MACD: Buy

## Tech commentaries:

The **XSGD / US Dollar** cryptocurrency price fell by **-0.243%** on the last day (Wednesday, 26th Jun 2024) from **\$0.737** to **\$0.735**. During the last trading day the cryptocurrency fluctuated **0.306%** from a day low at **\$0.735** to a day high of **\$0.737**. The price has been going up and down for this period, and there has been a **-0.1%** loss for the last 2 weeks. Volume has increased on the last day by **13 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **427 thousand** shares were bought and sold for approximately **\$314.22 thousand**.

The cryptocurrency is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **XSGD / US Dollar** cryptocurrency with a 90% probability to be traded between **\$0.736** and **\$0.752** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and cryptocurrencies seldom manage to go directly from the bottom of a trend up to the top. Cryptocurrencies turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **XSGD / US Dollar** cryptocurrency holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.737** and **\$0.740**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, May 28, 2024**, and so far it has fallen - **1.43%**. Further fall is indicated until a new bottom pivot has been found. **XSGD / US Dollar** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

**XSGD / US Dollar** finds support from accumulated volume at **\$0.731** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.737**, **\$0.740** and **\$0.746**.

In general the cryptocurrency tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the cryptocurrency moved **\$0.0023** between high and low, or **0.306%**. For the last week the cryptocurrency has had daily average volatility of **0.292%**.

**XSGD / US Dollar** holds several negative signals and is within a narrow and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this cryptocurrency. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this cryptocurrency since the last evaluation from a Buy to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
