The stock lies in the middle of a very wide and weak rising trend in the short term and a further rise within the trend is signaled. Mostly positive signals in the chart today. The **Zomedica** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. A buy signal was issued from a pivot bottom point on **Friday, April 19, 2024**, and so far it has risen 17.38%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Zomedica** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.146** and **\$0.155**.
