There are few to no technical positive signals at the moment. The **Zura Bio Limited Class A Ordinary Shares** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$3.43** and **\$4.57**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Friday, May 17, 2024**, and so far it has fallen **-45.95%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). **Zura Bio Limited Class A Ordinary Shares** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

Zura Bio Limited Class A Ordinary Shares finds support from accumulated volume at **\$3.14** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
